New York– IVDiagnostic Receives Chanute Team Award

The NWI Society of Innovators held their annual event honoring this year's top innovators. IVDiagnostics was the winner of the Chanute Team award for 2011.

IVDiagnostics is a biomedical diagnostic company focused on molecular diagnostic tests for circulating tumor cells and other blood borne diseases. Congressman Pete Visclosky stated that "IVDiagnostics represents not only outstanding entrepreneurship, but illustrates that Northwest Indiana can be a great home for more life sciences companies and that we have the right people for these jobs. I hope that the success of IVDiagnostics in our region will serve to convince other companies to come do their innovating here. I applaud IVDiagnostics' efforts in moving cancer research, and our region, forward, and congratulate them on this award."

We were extremely honored to receive this award and the credit goes to all those on our Team. It was certainly a special night to have earned this award the same night Congressman Pete Visclosky had received his award for Innovation and Service" stated Frank Szczepanski, President and CEO of IVDiagnostics.

Company Chief Science Officer, John Feczko, M.D. noted that IVDiagnostics is helping to lead the way toward personalized medicine: "If my fellow clinicians can determine what is occurring on a cellular and molecular level in real-time, then we can do more accurate analyses on tumor cells, and thus prescribe molecular medicine targeting solely the cancerous cells."

IVDiagnostics was most recently selected as “Revolutionary Company of the Future” by the SBDC. This additional award will be presented at the e-Day (Entrepreneurship) event being held at the Radisson in Merrillville on Nov. 17.

The Company’s mission is to save lives by providing oncologists and pathologists with better diagnostics tools for monitoring blood borne diseases.

IVDiagnostics was recently chosen as one of the Top 50 Innovators at the NY Venture Summit.
