LaPorte – IVDiagnostics CEO, Frank Szczepanski, recently presented at the LaPorte Rotary Club’s weekly meeting. IVDiagnostics is a biomedical diagnostic company focused on diagnostic tests for blood borne and other diseases.

Introduction of IVDiagnostics was made by Deb Varnak, Program Chair of the Rotary Club. The current President of the LaPorte Rotary Club is Mike Arnett.

IVDiagnostics was most recently selected as a Top 50 Innovator at the New York Venture Summit held in New York City on July of 2011. The Company’s mission is to provide oncologists and pathologists with better diagnostics tools for monitoring blood borne diseases.

Their first product is the IVD CTC assay which accurately measures circulating tumor cells (CTCs) which are known to be the way solid tumors metastasize to other parts of the body. By monitoring CTCs, physicians will be able to know the baseline CTC count on patients, use the IVD CTC assay on a regular basis to determine effectiveness or ineffectiveness of therapy.

IVDiagnostics is located at the Entech Innovation Center in Valparaiso.
