IVDiagnostics adds Chief Science Officer and VP, Medical Affairs

IVDiagnostics' President and CEO, Frank Szczepanski, announced the newest addition to their Management team. John D. Feczko, M.D., Ph.D., will join IVDiagnostics in the capacity of Chief Science Officer & VP Medical Affairs.

IVDiagnostics is a biomedical technology company focused on bringing innovative new diagnostic technology to assist physicians with earlier detection of cancer and other blood borne diseases. The Company has completed a preclinical trial and intends to proceed with a pilot clinical trial upon FDA approval.

Dr. Feczko brings over 20 years of expertise in pathology with a concentration in cytopathology. His medical background as a research scientist and medical doctor will be extremely useful in assisting the Company with the development of molecular diagnostics as the medical community and biomedical industry is moving rapidly toward the goal of personalized medicine. Dr. Feczko is the President Elect of the Medical Staff at Porter Health. He is actively involved in research related to breast and lung cancer and expects to make a significant difference in assisting the Company with the clinical application of IVDiagnostics' portfolio of cancer assays and the development of its in vivo platform.

IVDiagnostics is an Indiana based company with offices in West Lafayette and laboratories in Valparaiso, Indiana. The Company is a past recipient of a SBIR grant and matching grant from the Indiana Economic Development Corporation. The Company was a flagship sponsor for the American Cancer Society's "Making Strides" event, and will be a co-sponsor of the upcoming Purdue 5k Cancer Challenge.
